

LIV FACT SHEET

ClenzT:
Get it. Use it. Lose it.

Benefits:

- Supports normal bowel function
- Helps the bowels in their normal detoxification process
- Supports liver and kidney function
- Cleansing agent for the liver

ClenzT is the kick-start to the program. Use **ClenzT** for about two weeks once a month. This will help you eliminate waste and toxins that may be preventing you from losing weight and feeling good. Moving your waste out frequently contributes to good colon health. You'll feel lighter and have a bounce in your step. We consider it a moving experience.

ClenzT is formulated to assist your body to move out the excess waste and toxins that may have built up in your digestive system. Additionally, **ClenzT** works to support normal liver and kidney function. The primary function of the liver, kidneys and urinary system is to expel toxins that result from the body's metabolism of food and drink. Sometimes, when we have had a diet high in refined foods, alcohol, and sugars, our "clean-up committee" doesn't function optimally. When you change your diet to healthier foods, the body begins the natural process of detoxification. As the extra fat, sugars, and toxins are pushed through the liver and kidneys, the body needs extra support.

With the typical American diet, the average number of bowel movements is two per week. Most doctors agree that a healthy elimination system would move twice a day. **ClenzT** gets your system moving on a normal cycle. Unlike many laxative-type products, **ClenzT** is very gentle. It doesn't cause excess gas or cramping. It works with the natural rhythms of your body to eliminate in a more efficient manner.

Treat yourself to a great morning when you wake up feeling filled with energy and ready to take on the day. **ClenzT** can help you have a happy morning, every morning.

Directions for Use: Take 1-4 capsules of **ClenzT** at night every day for 2 weeks. You may require even more capsules for desired results. Capsules may be opened and mixed in water for a refreshing tea.

Ingredients: Senna Leaf Extract, Natural Lemon Flavor, Citric Acid, Ascorbic Acid, Milk Thistle Seed Extract, Dandelion Root Extract.
