

BLoX is like Homeland Security in a bottle. It strengthens and supports your immune system, and helps ward off the bad-guys that want to get in and wreak havoc with your body. It has been formulated to “block” potential health problems that may invade the body when the immune system isn’t functioning at its best. BLoX also supports the immune system when you are healthy, making sure you are prepared for whatever invader should knock at your door.

We recommend that BLoX be taken daily to insure maximum protection. BLoX is produced by a proprietary process to extract and concentrate the active ingredients. Each capsule contains the equivalent of 2000 mg of unextracted material. BLoX contains no animal materials.

Directions: Take 1-2 capsules daily. For periods of immune system stress: take 2-4 capsules daily.
