

GO NitriMax is a proprietary blend of the amino acids L-Arginine and L-Citrulline malate, as well as branched chain amino acids. These form a turbo-charged cycle of L-Citrulline creating more L-Arginine, which aids in the production of nitric oxide in the body. Nitric Oxide assists the body in supporting cardiovascular health and building lean muscle mass.

Each serving of GO NitriMax contains 5 grams of elemental pharmaceutical grade L-Arginine and L-Citrulline malate. Citrulline malate has been shown to increase energy production and decrease recovery time. These amino acids have been studied for more than 50 years.

GO NitriMax can help increase your energy levels during cardiovascular workout. Additionally, GO NitriMax contains important antioxidants which help maintain healthy cardiovascular function.

DIRECTIONS:

Mix one stick pack of GO into 4-8 oz. of water. Stir or shake to dissolve. For best results do not take with protein.
